**Attachments:** Forest Biotech Prepublication.pdf

Dear Sponsors,

I've attached a PDF of the prepublication version of the report entitled "Forest Health and Biotechnology: Possibilities and Considerations."

As a reminder, this report is under embargo until Tuesday, January 8 at 2pm ET. While you are welcome to share it with your staff and others internally, please caution them that the report remains under embargo until this time and it cannot be shared beyond those at your institution.

The report will undergo further editorial revision before its final printing. If you find any egregious or factual errors let Kara Laney know, and we may be able to fix them for the final report

At the time of the public release on Tuesday, January 8 at 2pm ET, the report will be publically available for download on the National Academies Press website [www.nap.edu](http://www.nap.edu). After report release, we prefer you share a link to the NAP website rather than sharing the attached pdf. I will send out a public email announcement for the report release later this week.

Thank you very much for your support. Happy New Year!

Jenna
